CMEC REGISTRATION

CMEC INFORMATION

CENTRAL MN EMERGENCY COMMUNICATIONS

The St. Cloud Amateur Radio Club is heavily vested in Emergency Communications. We meet the first Thursday of the month @ 7:00 pm at the SCARC Clubhouse to hone our skills, refine our objectives, explore new ideas and procedures, conduct training, etc. To that extent, we have implemented CMEC – Central MN Emergency Communications, as a division of the Club. We encourage all Ham Radio Operators to declare their intent to help in time of need. Currently we are starting with basic online FEMA training classes, and will expand this training as time goes forward. To start with, we ask that all interested Hams start with IS-100b, IS-200b, IS-700b, & IS-800b. These can be found at FEMA Training, under Independent Study and can be found by simply searching Google. You will need to register for a FEMA Student ID before completing the short exam. Once you have completed each course and have your certificate, please email a copy of the .pdf to k9mp@w0sv.club. CMEC is comprised of four distinct groups:

SACOMM – Served Agency Communications — Rick Collins, KU5MC

The Served Agency Communications group works directly with local agencies to help facilitate communications and necessary forms via HF/VHF/UHF radio when other modes of communication are unavailable. To that end, we have invested in extensive radio capabilities designed for this area in particular.

HRES – Ham Radio Emergency Services — Rick Collins, KU5MC

The Ham Radio Emergency Services group voluntarily serves the Community in time need such as natural disaster, mass casualty, civil unrest, or other catastrophic events.

RHC – Central MN Regional Hospital Coalition — Rick Collins, KU5MC

The Central Minnesota Healthcare Preparedness Program is a healthcare coalition made up of members from Clinics, Hospitals, Long-Term-Care facilities, Emergency Management, Emergency Medical Services, Local Public Health Departments, Amateur Radio Operators, and many other agencies/organizations. Currently, once a month on the first Wednesday @ 1:00 pm, we run a NET to help make sure that the coalition is able to communicate when conventional communication modes are out of service.

SKYWARN – Central MN Skywarn — Rick Collins, KU5MC

The Saint Cloud Amateur Radio Club is the host of the Central Minnesota Skywarn program under the Director of Emergency Communications. Central Minnesota Skywarn currently serves Stearns County via the SCARC Emergency Services Repeater, and Benton County via the Benton County Emergency Services Repeater. When the National Weather Service activates our group, we deploy a network of trained spotters that report their observations via radio to Net Control in our EOC so that we may pass possible life saving information to the National Weather Service.

SKYWARN REGISTRATION

I would like to sign up for SKYWARN:

Please be as specific as possible. As this information needs to be verified to comply with the National Weather Service Certified Spotter and Train the Trainer Program.

DATE OF LATEST TRAINING

LOCATION OF LATEST TRAINING

- Training was a normal 'Skywarn Spotter' class (Required every two (2) years)
- Training was a NWS/MPX 'Train the Trainer' class (Required every three (3) years)

Spotter Area Activation Requests

Central Minnesota Skywarn activates its spotters via text messaging. Due to the expanding area covered by Central Minnesota Skywarn we will be activating spotters by the general area they wish to actively cover. Please indicate the areas you would like to be activated for in the current list below.

- Stearns County
- Benton County, i.e. Foley
